

Scott Winterbourne

Software Engineering Manager

Leading multiple Scrum teams while spearheading innovative cost-saving solutions and overseeing the company-wide migration of on-prem workloads to the cloud.

EXPERIENCE

Software Engineering Manager Enlyte

July 2021 - PRESENT

- Oversaw a cross-functional project across multiple business units, migrating hundreds of VMs from an insecure on-premises OpenStack environment to the cloud, resulting in a more secure environment.
- Managed three scrum teams of 9 engineers owning 20+ microservices used across the company and by customers.
- Successfully delivered multiple complex projects on time and within budget, resulting in a 20% increase in customer satisfaction and a 10% improvement in project success rate.

Senior Software Engineer Enlyte

September 2018 - July 2021

- Develop platform services using microservice architecture, Java, and SpringBoot
- Work with cross functional teams to gather requirements and collaborate on testing and integrations.
- Design new services to solve business problems across the organization.

Software Engineer Enlyte

February 2016 - September 2018

- Develop and update features on existing platform microservices
- Write unit tests in JUnit to ensure 85% unit test coverage.
